Join us for a webinar introducing brain-based strategies to accelerate learning for students of all backgrounds and ability levels. The webinar is hosted by author, Chris Yeager. Thinking Maps is a visual “Language for Learning” used across all grades and content areas to:

- Increase student ownership for learning with portable learning strategies
- Increase academic equity by helping students of all backgrounds access grade-level content
- Give teachers a foundational set of tools for effective instruction, planning, and assessment of student understanding
